

**Hello, my name is Callum** and I joined Wymondham High from a little school called Hingham Primary, about a tenth the size of this. First things first, this is a very big school but there are lots of friendly people to help if you do get lost (which you do quite often at the start), but I know my way now and absolutely everyone I know made new friends.

My favourite subjects are science as you get to work in a lab and use proper equipment which I really enjoy, and maths, simply because it's my strongest subject (even though my maths teacher's an Ipswich fan!) The school dinners are delicious too. They give you a variety of tasty meals every day. Also, there are lots of after school clubs which are really interesting and give you the chance to try something new. I do chess, football, homework and running, which are all really good or helpful. Football's my favourite as I really enjoy the sport and it's a good chance to make new friends as well.

When people come up to high school they tend to be scared of the teachers, but as long as you behave, they all respect you too. I hope to see you here soon.

Thank you.
