

Hello, my name is Isobel, and I came from Robert Kett Junior School. Even though Robert Kett is one of the bigger primary schools, high school still seemed massive when I started. Getting lost was the biggest worry for most Year 7's. However, there is no point in worrying as there are so many older students and prefects who will be happy to help you.

Finding your friends is not such a big worry as you make friends with all the people in your classes.

Coming from a school with no sets, to a school where you have every lesson in a different class is quite hard, but you soon get used to it.

Lessons here are much more interesting than at primary, for instance science is done in labs and you work with chemicals, Bunsen burners and much much more. My favourite lessons are English as I probably have two of the kindest teachers and it's my strongest subject. I also enjoy tech as we have already made door signs and programmed robots. Music here is really good. We have already started up mini bands, learnt to play the ukuleles and keyboards.

I hope you have a good evening. Thank you.
